SAFETY DATA SHEET

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Trade Name: Zinc Dross
CAS Number: 69011-50-3
Synonyms: Galvanizing Dross
Use/Description: Dross, skimmings, flakes or spillings from zinc coating operations

For general product information, contact facility as listed above. For emergencies, use the 24 Hour Contact.

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Potential Health Effects
Eye Contact
Dusts or particulates may cause mechanical irritation including pain, tearing, and redness. Scratching of the cornea can occur if eye is rubbed. Fumes may be irritating. Contact with the heated material may cause thermal burns.

Skin Contact
Dusts or particulates may cause mechanical irritation due to abrasion. Some components in this product are capable of causing an allergic reaction, possibly resulting in burning, itching and skin eruptions. Contact with heated material may cause thermal burns.
Inhalation
Dusts may cause irritation of the nose, throat, and lungs. Excessive inhalation of metallic fumes and dusts may result in metal fume fever, an influenza-like illness.

Ingestion
Not expected to be acutely toxic via ingestion based on the physical and chemical properties of the product. Swallowing of excessive amounts of the dust may cause irritation, nausea, and diarrhea.

Potential Fire and Explosion Hazards
Solid zinc in compact form does not present fire or explosion hazards unless heated > 500 degrees C. Zinc dust or powder, however, is flammable when exposed to heat or flame and may even spontaneously ignite in air.

Chronic or Special Toxic Effects
No data available. EPA has listed Zinc as Group D (not classifiable as to human carcinogenicity) based on no human or animal data. Zinc has not been listed by ACGIH, IARC, NIOSH, or NTP.

Target Organs
Overexposure to specific components of this product that are generated in dusts or fumes may cause adverse effects to the following organs or systems: lung, kidney.

Medical Conditions Aggravated by Exposure
No data available.

4. FIRST AID MEASURES

Eye Contact - In case of overexposure to dusts or fumes, immediately flush eyes with plenty of water for at least 15 minutes occasionally lifting the eye lids. Get medical attention if irritation persists. Thermal burns should be treated as medical emergencies.

Skin Contact - In case of overexposure to dusts or particulates, wash with soap and plenty of water. Get medical attention if irritation develops or persists. If thermal burn occurs, flush area with cold water and get immediate medical attention.

Inhalation - In case of overexposure to dusts or fumes, remove to fresh air. Get immediate medical attention if symptoms described in this Safety Data Sheet (SDS) develop.

Ingestion - Not considered an ingestion hazard. However, if excessive amounts of dust or particulates are swallowed, treat symptomatically and supportively. Get medical attention.

Notes to Physician - Inhalation of metal fume or metal oxides may produce an acute febrile state, with cough, chills, weakness, and general malaise, nausea, vomiting, muscle cramps, and remarkable leukocytosis. Treatment is symptomatic, and condition is self limited in 24-48 hours. Chronic exposure to dusts may result in pneumoconiosis of mixed type.

5. FIRE FIGHTING MEASURES

Flash Point (Method) – No data available.
Flammable Limits (% volume in air) - No data available.
Auto ignition Temperature - 460°C (860°F) as dust/powder
Extinguishing Media – For small fires, use dry chemical powder. Large fires: Use water spray or fog.
Zinc Dross

Special Fire Fighting Procedures - Do not use water on molten metal. Cool containing vessels with water jet in order to prevent pressure build-up, autoignition, or explosion. Firefighters should not enter confined spaces without wearing NIOSH/MSHA approved positive pressure breathing apparatus (SCBA) with full face mask and full protective equipment.

Unusual Fire or Explosion Hazards – Contact with acids may result in evolution of hydrogen with sufficient heat of reaction to ignite the hydrogen gas. Reactive with water and may produce flammable gases. Dust/powder may ignite on contact with water or moist air. Any non-oxidized fine metal particles/ dust generated by grinding, sawing, abrasive blasting, or individual customer processes may produce materials that the customer should test for combustibility and other hazards in accordance with applicable regulations. High concentrations of combustible metallic fines in the air may present an explosion hazard.

6. ACCIDENTAL RELEASE MEASURES

Precautions if Material is Spilled or Released - Emergency response is unlikely unless in the form of combustible dust. Avoid inhalation, eye, or skin contact of dusts by using appropriate precautions outlined in this SDS (see section 8). Fine turnings and small chips should be swept or vacuumed and placed into appropriate disposable containers. Keep fine dust or powder away from sources of ignition. Scrap should be reclaimed for recycling. Prevent materials from entering drains, sewers, or waterways. Specific standards and regulations may be applicable to materials generated by individual customer processes. As appropriate, these standards and regulations should be consulted for applicability.

7. HANDLING AND STORAGE

Storage Temperatures - Stable under normal temperatures and pressures.
Precautions to be Taken in Handling and Storing – Follow good housekeeping practices to minimize dust. Wear adequate protective clothing (see Section 8). Store in a cool, dry area away from incompatible materials (see Section 10).

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Operations with potential for generating high concentrations of airborne particulates or fumes should be evaluated and controlled as necessary.
Eye Protection - Use safety glasses. Dust resistant safety goggles are recommended under circumstances where particles could cause mechanical injury such as grinding or cutting. Face shield should be used when welding or cutting.
Skin - Appropriate protective gloves should be worn as necessary. Good personal hygiene practices should be followed including cleansing exposed skin several times daily with soap and water, and laundering or dry cleaning soiled work clothing.
Respiratory Protection Not required under normal conditions of use. NIOSH/MSHA approved dust/fume/mist respirator should be used if occupational exposure limits are exceeded. See Section 3 for component material information exposure limits. If such concentrations are sufficiently high that this respirator is inadequate, or high enough to cause oxygen deficiency, use a positive pressure self-contained breathing apparatus (SCBA). Follow all applicable respirator use, fitting, and training standards and regulations.
Ventilation - Provide general and/or local exhaust ventilation to control airborne levels of dust or fumes below exposure limits.
Exposure Guidelines - See Section 3 for component occupational exposure limits.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance and Odor – Silver gray metallic mass; odorless
Boiling Point – No data available
Melting Point - Approximately 787 °F (419 °C)
PH - No data available
Specific Gravity (at 15.6°C) – Approx. 7
Density (at 15.6 °C) - No data available
Vapor Pressure - No data available  
Vapor Density (air = 1) - No data available  
% Volatile, by Volume - Not applicable  
Solubility in Water - Insoluble.  
Evaporation Rate (Butyl Acetate = 1) - No data available  
Other Physical and Chemical Data - None

10. STABILITY AND REACTIVITY

Stability - Stable  
Conditions to Avoid – Moisture  
Hazardous Polymerization - Will not occur.  
Incompatibility (Materials to Avoid) - Strong acids, Oxidizing agents  
Hazardous Decomposition Products – Thermal oxidative decomposition can produce fumes containing oxides of zinc as well as other elements.

11. TOXICOLOGICAL INFORMATION

Acute toxicity: not classified.  
Zinc: rat oral LD$_{50}$ is $> 2000$ mg/kg.  
Zinc oxide: rat oral LD$_{50}$ is $> 5000$ mg/kg.  
Skin corrosion/irritation: not classified  
Eye corrosion/irritation: not classified  
Respiratory or skin sensitization: not classified  
Germ cell mutagenicity: not classified  
Carcinogenicity: not classified  
Reproductive toxicity: not classified  
Target organ toxicity – single exposure: not classified  
Target organ toxicity – repeat exposure: not classified  
Aspiration hazard: not classified

12. ECOLOGICAL INFORMATION

Aquatic Ecotoxicological Data – Zinc is very toxic to aquatic life with long lasting effects.  
Environmental Fate Data - No specific information available on this product.

13. DISPOSAL CONSIDERATIONS

Recovery and reuse, rather than disposal, should be the ultimate goal of handling efforts. Dispose in accordance with federal, state, and local health and environmental regulations. Prevent materials from entering drains, sewers, or waterways.

14. TRANSPORT INFORMATION

DOT Shipping Information: Zinc Dross, flakes, skimmings, or spillage must be transported in accordance with applicable US Department of Transportation Regulations.
15. REGULATORY INFORMATION

This product is not hazardous under the criteria of the Federal OSHA Hazard Communication Standard 29 CFR 1910.1200. However, dusts and fumes from this product may be combustible or hazardous and require protection to comply with applicable Federal, state and local laws and regulations.

California Proposition 65:

⚠️ WARNING: This product can expose you to chemicals including antimony [oxide], chromium [hexavalent], cobalt, cadmium, lead, and nickel which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Massachusetts Substance List: Aluminum, Antimony, Cadmium, Chromium, Cobalt, Copper, Manganese, Lead, Nickel, Silver, Thallium, Tin, Zinc, Zinc oxide

Pennsylvania Hazardous Substance List: Aluminum, Antimony, Cadmium, Chromium, Cobalt, Copper, Manganese, Lead, Nickel, Silver, Thallium, Tin, Zinc

New Jersey Hazardous Substance List: Aluminum, Antimony, Cadmium, Chromium, Cobalt, Copper, Manganese, Lead, Nickel, Silver, Thallium, Tin, Zinc, Zinc oxide

Toxic Substances Control Act (TSCA)

Components of this product are listed on the TSCA Inventory.

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)

16. OTHER INFORMATION

This SDS covers Nucor product as delivered from the Nucor facility, but does not include chemicals that may be applied by subsequent handlers and/or distributors of this product. This could include a variety of materials including oils, paints, galvanization, etc. that are not included in this SDS. Additionally, specialty orders may require application of coating material not listed in this SDS. SDSs for any Nucor-applied specialty coating will be provided separately. During welding, precautions should be taken for airborne contaminants that may originate from components of the welding rod. Arc or spark generated when welding or burning could be a source of ignition for combustible and/or flammable materials. The information in this SDS was obtained from sources which we believe are reliable; however, the information is provided without any representation or warranty, expressed or implied, regarding the accuracy or correctness. The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage, or expense arising out of or in any way connected with the handling, storage, use, or disposal of this product.
